

Product overview

The DS clamps have been designed to provide suspensions for \varnothing 2 to 16mm aerial ADSS cables at intermediate poles on cable routes with angle $< 20^\circ$ on access networks (spans up to 100m).

In case of angle $> 20^\circ$ install two dead-end clamps instead.

REF	MODEL	\varnothing CABLE	MATERIAL	Screw
FS-9170	DS6	6.1-8 mm	Body: Nylon Sleeve: Neoprene	-

Description

The suspension clamp DS consists of a nylon body with an integrant nylon bail and a neoprene sleeve. On the models DS2 / DS4 / DS6 the body is secured around the cable with 2 clips and one optional tie. On the large models DS8 / DS12 a bolt is used to secure the body around the cable.

Benefits

- Lightweight, compact, cost effective design.
- 5 models to cover round / flat cables from \varnothing 2 to 16mm.
- Installation in seconds
- The suspension bails provide additional protection of the cables against wind induced vibrations.
