

Product overview

These clamps are designed to provide a suspension for 8 to 16mm aerial ADSS cables at intermediate poles on cable routes with angle < 20° on access networks (spans up to 100m).

They should be installed on cross-arms or suspension brackets.

REF	MODEL	Ø CABLE	MATERIAL	Screw
FS-9215	DS8-12	8-12 mm	Body and Sleeve : UV protected neoprene	Protected steel
	DS12-16	12-16 mm	Body and Sleeve : UV protected neoprene	Protected steel

Description

The suspension clamps DS8-12 and DS12-16 consist of a nylon body with integrant suspension bail and a neoprene sleeve. A bolt is used to secure the body around the neoprene insert.

Benefits

- Two sizes to cover the range of ADSS cables from 8 to 16mm.
- Installation in seconds with a 13 mm standard 6-point spanner.
- The suspension bail provides additional protection of the cable against wind induced vibrations.
